**Ecofriendly power solution  
for sustainable future**

Make in India

## Company Overview

Su-Kam was founded in 1998 by Mr. Kunwer Sachdev, a first generation entrepreneur, who has led the company in becoming a leading Indian brand and a successful example of 'Make in India'.

Headquartered in Gurgaon, and with 6 state-of-the-art manufacturing facilities, Su-Kam leads the market with innovative products and a large sales and service network.

Su-Kam is the only power solutions company to be recognized for its R&D by the Department of Science and Technology, Government of India. The company is credited with filing the highest number of patents in the industry.

Su-Kam has received several prestigious awards like India's Most Trusted Brand in its category for 2015, Solar Energy Leader Award 2014, National Award for Quality Product from Government of India, etc.

Su-Kam has executed several large scale commercial and industrial solar projects, thereby providing cost effective and green energy solutions. Su-Kam is one of the leading players in solar energy in India and has a wide range of highly efficient and value for money products for household use.

**CRISIL-MNRE Grade SP1A**  
Certificate - 2015

# Awards and Accolades

**INC. India Innovative 100 Award - 2013**

**Solar Energy Leaders Award - 2014**

**Global Achievers Award for Business Leadership - 2014**

**Asia's Most Promising Brand - 2013**

**Most Trusted Brand in India - 2015**

**Quality Excellence Award for most innovative company - 2014**

**Certificate of TÜV IEC EN 61215-205  
6th August - 2015**

**Certificate of TÜV IEC EN 61730-1-2007  
6th August - 2015**

**ISO Certification  
ISO 14001-2004 & ISO 9001-2008**

Su-Kam has maximum number of patents in India, as many as 75 Technology Patents & 83 Design Patents

# A Glimpse Of Su-Kam's Solar Projects

UPNEDA

250 KWp Mini Grid Solar Power Plant for UPNEDA, Kannauj, U.P.

Solar 100 KWp Installation for the Assam State Electricity Board, Assam

100 KWp Rooftop Solar Power Plant in SBI Academy, Gurgaon

250 KWp Solar Power Plants at DMRC Stations, Gurgaon

1MW Power India's Largest Grid Connected Rooftop Solar Plant on an Educational Institute - Punjab Engineering College, Chandigarh

150 KWp Powering ITM University in Gurgaon with Solar Power

Su-Kam facts

Su-Kam has 181 Copyrights and 169 Trademarks which is highest in India by any standard

**Su-Kam builds the perfect modules: for single-family households, farms, schools, industrial use and solar power plants. The company builds modules that optimally adapt to the living and sun conditions in your region**

## New Product Introduction

### Poly Crystalline Modules

High performance, small frames and perfect for small roofs to Megawatt size power plants.

**Poly Crystalline  
250Wp / 12V**

### Mono Crystalline Modules

Universal and versatile use for every roof

**Mono Crystalline  
320Wp / 24V**

### Black Pearl Series

High performance and large format, ideal for large surfaces

**Pearl 250Wp / 24V  
with Black Frame**

**25  
YEARS**  
Linear  
Warranty

#### Industry leading linear warranty

With Su-Kam's linear warranty you receive one of the best warranties in the industry. In the first year 97%, thereafter, for the second year to the twenty-fifth year a maximum decrease of the module's nominal power output of 0.75% per year. Thereby one ends with 80% nominal power guaranteed in the 25th year after the defined warranty starting date.

**5  
YEARS**  
Product  
Warranty

#### 5-year product warranty

Su-Kam relies on certified quality in minute detail. For this reason, we can give a warranty of 5 years on the stability of all components.

*Su-Kam modules are all perfectly set not only for sunny days, but also effective for snow days, cloudy days, foggy days, and stormy days – This enables you to optimally utilize them for clean energy.*

**Su-Kam has efficient modules which can produce more energy from the same or even lower sunlight**

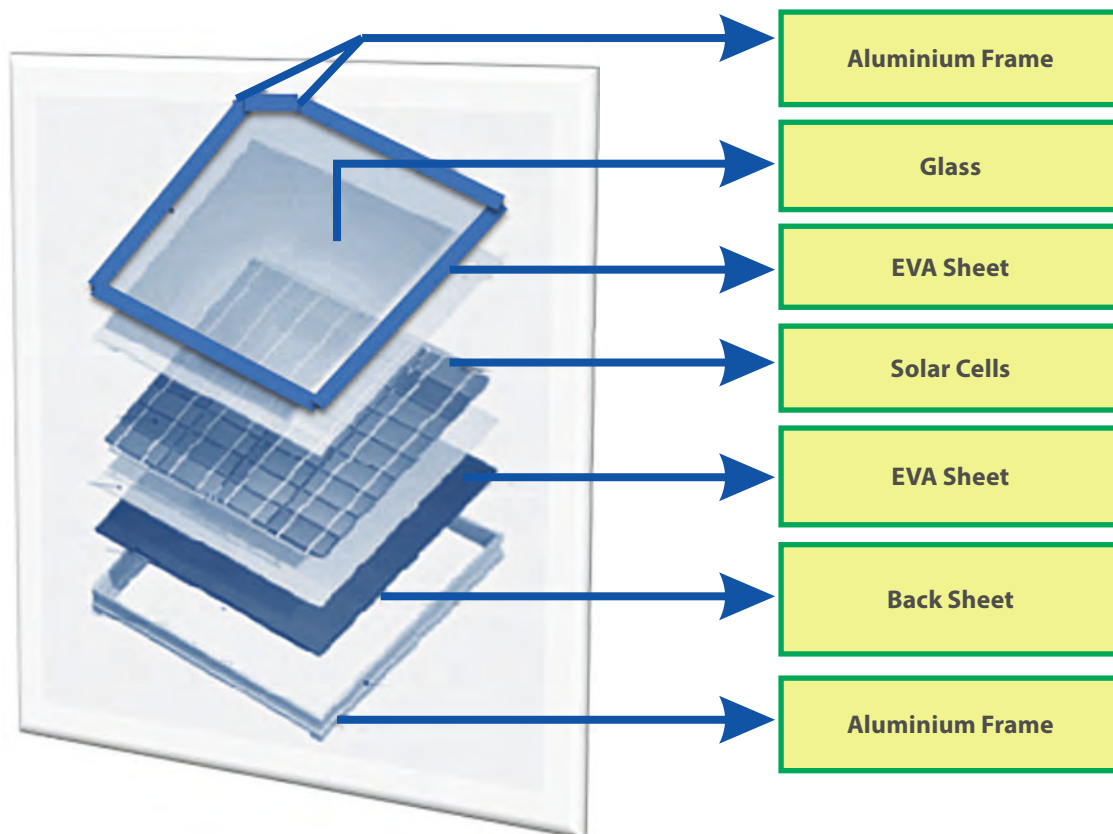

These components ensure that our modules are reliable and efficient:

Rigid frame: a hollow chamber profile ensures rigidity and high performance

State-of-the-art solar glass: anti-glare and self-cleaning for maximum output and low maintenance effort

High-tech material EVA: highly transparent to provide an extremely stable connection of components

Solid back sheet: high level of UVA resistance – a solid basis delivers solid output

*Su-Kam facts*

Su-Kam has an employee strength of 2800+ to deliver to utmost capacity

### Excellent module efficiencies

Roofs often have limited space for solar systems. The higher the solar module's efficiency, the better the surface efficiency of the entire system. Our solar modules offer above-average efficiencies.

### Su-Kam's innovative cell design

Finer power lines: higher cell efficiencies for more yield through less shading effects

Usage of ultra-modern silver paste:

### PID Resistant

Improved cell design and production process ensure the power output performance under harsh environment. High volume resistant EVA could limit the movement of the sodium ions from the cell surface to glass.

### PID Resistant

Industry Standard

Low resistance: more energy gets lost

Su-Kam

High resistance: no energy gets lost

### Resistant against wind and snow

The rigid hollow chamber profile frame ensures high rigidity of the Su-Kam modules. They withstand snow loads of up to 550 kg/m<sup>2</sup> and wind speeds of up to 190km/h – clearly exceeding the provisions of IEC.

Load test: 2.5 m

Wet Snow = 890 kg

### Tested for toughest environmental conditions

Particularly in agricultural holdings, modules are subject to high loads of ammonia. Therefore, Su-Kam equips the modules with a highly resistant back sheet. Tested and approved by TÜV Rheinland (German Technical Inspection Association) and VDE.

# Su-Kam Advantages

Su-Kam has a wide Service Network around the world as well as in India

Solar PV Panels are a wise investment, have a degradation rate of less than 0.75% per year, which is lower than other solar panels

Top most layer of Panels are manufactured with toughened glass to increase its life, besides being easy to maintain and clean

Our experienced engineers ensure that all panels are installed with 100% accuracy for maximum performance year after year

*Su-Kam facts*

Su-Kam has 6 state-of-the-art manufacturing plants

# QUALITY ASSURANCE

- ✓ 100% inspection by EL tester
- ✓ Excellent low light performance
- ✓ 100% inspection by sun simulator
- ✓ Modules can perform under extreme environmental conditions
- ✓ Rigorous quality control standards

\* These specifications are Copyright of Su-Kam

**Note:**

- The above specifications pertain to the standard SPV Modules. We can also supply SPV Modules of different ratings to meet specific technical requirements.
- Electrical specifications mentioned above are under standard test conditions as follows [a] light spectrum of AM 1.5 [b] an irradiation of 1,000 Watts per square meter and [c] a cell temperature of 25 degrees Centigrade. Normal production tolerance of +/-3%
- Due to continuous process innovations, the modules supplied may differ from those specified above.

**Su-Kam facts**

Su-Kam has International Presence in SAARC Region, Middle-East Asia & Africa

# APPLICATION AREAS

Domestic lighting systems

Pumping Borewell Water

Crop Sprayer

Power pack for village electrification

*Su-Kam facts*

Su-Kam has its own R&D Centre that works round the clock to develop new product line

Water Pumping

Petrol Pump

Railway Signaling And Lighting Systems

Rural Radio Phones And Exchanges

Offshore Platforms

Desalination Plants

Cathodic Protection Systems

Sign Boards & Glow Signs

Committed to a cleaner environment  
with green technology
